

DHANYAVADH B

dhanyavadhb69@gmail.com | +91 74834 64370

Summary:

Recent Data Science graduate with strong foundation in Machine Learning, AI, and Statistical Analysis. Skilled in Python, SQL for data preprocessing, feature engineering, and model building. Hands-on project experience in customer analytics, credit risk assessment, and Generative AI chatbot development. Proficient in data visualization using Power BI, Matplotlib, and Seaborn to generate business insights. Passionate about leveraging data-driven solutions to solve real-world problems with strong communication and teamwork skills.

Technical Skills:

Programming: Python, SQL

Machine Learning & AI: Scikit-learn, XGBoost, NLP, Generative AI

Data Analysis & Processing: Pandas, NumPy, Data Wrangling, Feature Engineering

Visualization & BI Tools: Matplotlib, Seaborn, Power BI, Data Storytelling, Dashboards

Statistics & Analytics: Hypothesis Testing, Regression, Classification, Clustering

AI & LLM Tools: OpenAI API, Prompt Engineering

Databases: MySQL, SQL Server

Internship

AI/ML Intern

(APR 2025-Present)

- Gained hands-on experience in data preprocessing, ML model development, and analytics workflows.
- Worked on projects involving customer segmentation, churn prediction, and Generative AI chatbot development.
- Applied classification and regression models using Logistic Regression, Random Forest, and XGBoost.
- Deployed ML models on Azure ML for real-time performance monitoring.
- Created Power BI dashboards to present insights and support business decision-making.

Projects

Retail Customer Analytics Platform:

Tools: Python, Scikit-learn, Pandas, SQL, Power BI

- Developed an analytics platform to analyze customer behavior and predict customer lifetime value.
- Implemented **customer segmentation** using clustering algorithms.
- Built predictive models for **churn analysis** and customer lifetime value forecasting.
- Designed **Power BI dashboards** for real-time insights.

GenAI & Agentic AI Chatbot System:

Tools: Python, OpenAI API, LangChain, Streamlit, NLP

- Built an AI-powered chatbot using NLP and Generative AI (LLMs) for automated customer support.
- Integrated OpenAI GPT models with LangChain for response generation.
- Designed conversation flow and knowledge base integration.
- Implemented performance monitoring and optimization framework.

EDUCATION:

G.T. Institute of Management Studies and Research

MCA (Master of Computer Applications) | 2023 – 2025
